

CONTAINS
2x READERS
1x TWO-DOOR CONTROLLER

You'll wonder why expanding other access control solutions aren't this simple...

Stanley Expansion Kits make it easy to expand the system at any time, in two door increments. Each Starter Kit can support 23 Expansion Kits, enabling 48 doors to be monitored and controlled, using just one IP address.

Key Features include:

- 2-Door Controller and 2x Mullion Proximity Readers
- Connect up to 23x Expansion Kits to each Starter Kit using RS-485
- Supports 2 readers on each door (E.g. Dual Entry [ADA] or Entry and Exit)
- No additional Power Supply required, 2A@12VDC available to locks
- Dedicated Door Contact and REX connections
- Only requires inexpensive unshielded 22AWG cable
- One-Touch™ installation test mode enables the installation to be tested at the door, by just one technician before any software is installed

What's in the Stanley Expansion Kit?

STANLEY® 512 Boxed 2-Door Controller

2 x STANLEY® Mullion Proximity Readers
